

Alfred Johansson

DEVELOPER

Recent graduate with a strong foundation in C# and object-oriented development. Shipped a game on Steam with 25,000+ copies sold and currently leads a 12-person team as technical lead. Works with AI tools as a natural part of the development flow. Thrives where code quality and detail matter, and picks up new technologies quickly. A C# background makes the step to other languages short.

EXPERIENCE

- | | |
|------------------------|--|
| 2026
Jun-Aug | QA Intern
Odd Raven Studios · Stockholm <ul style="list-style-type: none">Playtests an unannounced title in structured daily sessions and reproduces bugs with clear repro steps and recorded playthroughs, including a softlock in the dialogue system.Writes actionable bug reports and design feedback with proposed solutions, and reworked the studio's reporting flow into a tagged, filterable format that simplifies prioritisation for development management.Onboarded independently via the studio's internal documentation: new version control system, conventions and a professional development pipeline. |
| 2025
-2026 | Vice Chair, student association
LVL · Södertörn University game development association <ul style="list-style-type: none">Led the association's events for game development students, coordinated the team and owned communication with external partners (15+ events).Designed and ran workshops introducing around 30 students to game development, with experience in planning, presenting and leading groups. |
| 2021
-2023 | Data Analyst & Research Assistant
Foodfacts Sweden · Remote <ul style="list-style-type: none">Delivered data analysis fully remotely, with strong self-management, accuracy and clear written communication. |

DEVELOPMENT PROJECTS

- | | |
|------------------------|--|
| 2025
Steam | Murmurs of the Mist · Lead designer & programmer
JamJam Studios · narrative-driven horror puzzle game <ul style="list-style-type: none">Shipped a narrative-driven horror puzzle game on Steam (25,000+ copies) and led programming and design from first prototype to release in an 11-person team.Owned the technical foundation as CTO: architecture decisions, version control (Perforce) and build pipeline. |
| 2026
ongoing | Pizza to Hell · Technical lead & designer
Pizza to Hell HB · own company <ul style="list-style-type: none">Leads a 12-person team as work lead: sets the workflow, runs sync meetings and keeps the systems modular and integration-ready.Built the finisher system from scratch with clean integration between team-owned modules, plus an event-driven footstep system. |
| 2026
solo | Harpoon · Solo project <ul style="list-style-type: none">Built the player controller and enemy AI with custom A* navigation and surface-crawling movement in Unity 6. |

EDUCATION

- | | |
|----------------------|---|
| 2023
-2026 | Bachelor's degree in Media Technology
Södertörn University · specialisation in game development, design and scripting |
| 2020
-2023 | Upper secondary diploma, Technology Programme
LBS Kreativa Gymnasiet |
